

Math Make and Take Night For Pre-School and Kindergarten

I would like to thank those who participated in making our first Pre-K and Kindergarten “Math Make and Take Night”, a success! I would also like to thank Carol Cohen for her expertise in EveryDay Math. It was a wonderful turnout, we had a 50% turnout from Kindergarten and a bit shy of 50% for Pre-School, due to some illnesses.

Knowing how busy everyone’s schedule is, it was truly appreciative of the willingness of those that came out to learn more about our EveryDay Math Program, while spending some time with your family making math games.

The “Math Make and Take Night” was presented as part of an ongoing effort to connect with the community at a Pre-School and Kindergarten level. This is one of the many programs that will be rolled out to give the community more insight about our curriculum programs.

Your feedback is very valuable and we hope that with your continued support and feedback you will make the other rollouts just as successful. I encourage you to make any suggestions on what you might want to learn more about or any changes you would like to see from the “Math Make and Take Night”. You can email me at jdriescoll@sau83.org .

Again, the “Math Make and Take Night” would not have been a success without your involvement, so THANK-YOU! I look forward to connecting with you again in the future!
