John Safina
Middle School Principal

January 12, 2010

Dear Parents and Guardians:

Ellis School will be having an H1N1 flu vaccination clinic on January 26, 2010. All students and staff are eligible to attend the clinic. Please read the vaccine information sheets attached to this letter. Once you have read the information sheets, fill out the Consent Form attached to this letter and return it to the Ellis School office by January 22, 2010. If for some reason our school cannot hold the clinic on this date, you will be notified when the clinic will occur.

Children under the age of 10 will need to have a booster vaccine 28 days or more after their first vaccine, for a total of 2 doses of vaccine. If your child under 10 has received the first vaccine, please indicate this on the Consent Form, making sure to include the date of the first vaccine. Children over the age of 10 need only one dose of the vaccine.

If you do not fill out this Consent Form completely, your child will not be given the vaccine.

Information on H1N1 influenza and the vaccine can be found at www.nh.gov/h1n1, www.flu.gov, and www.cdc.gov/h1n1flu/parents. If you have questions about the H1N1 influenza or the vaccine, contact your physician.

If you have questions about the vaccine clinic at Ellis School, please call Mrs. Milner, Ellis School Nurse, at 895-2511, extension 420. Parents may attend the clinic with their child.

Sincerely,

John Safina
Middle School Principal
